Waupun Utilities' annual Water Quality Report for 2026 (Consumer Confidence Report (CCR)) is complete and available for review. This report provides a complete summary of water quality information from 2025 and also includes general information describing the city's water system, services and other activities of interest. Waupun Utilities is committed to providing our customers with clear information describing water quality. Informed customers are strong allies.

History of the Annual Water Quality Report

The Water Quality Report a.k.a. Consumer Confidence Report (CCR) is required annually by the Federal Environmental Protection Agency (EPA). The CCR must be prepared and distributed to all water systems customers, in order to provide information concerning water quality for the previous monitoring year. This report identifies detected contaminants, compliance with drinking water rules, educational language, and is based on information reported to the Wisconsin Department of Natural Resources (DNR).

Summary of Results

Waupun Utilities adheres to the highest state and federal drinking water standards. We routinely collect more samples and run more tests than are actually required by the EPA and DNR. Unless otherwise noted, results are based on testing conducted in 2025. We are pleased to report that we continue to supply high quality water that meets or exceeds all federal and state standards for health and safety.

The complete Waupun Utilities 2025 Annual Water Quality Report can be found on our website at www.waupunutilities.com by clicking the Water Quality Report link shown on the bottom portion of the screen or by going to Customer Services/Water Department. A copy can also be picked up at our office or emailed upon request.
